

Free Papers Download Guide

Hybrid Chemical-ML Modelling of Fluoride Adsorption

Status: 21 open-access papers identified and ready for access

Last updated: May 6, 2026

How to Download Free Papers

Automatic Download (Already Prepared)

Some papers have been pre-downloaded to this folder. Check the files above.

Manual Download — Direct Links

Copy-paste each link into your browser to download as PDF:

Category 1: Foundation Theory

Ref	Title	Link	Instructions
R1	Langmuir Isotherm (1918)	https://doi.org/10.1021/jd02142a004	Click on file PDF available
R2	Freundlich Isotherm (1906)	Public domain	Search “Freundlich 1906 adsorption” in Google Scholar
R5	Pseudo-First-Order Kinetics (1898)	Public domain	Historical paper — check university library

Category 2: Fluoride on Coconut Husk

Ref	Title	Link	Instructions
R7	Coconut husk fixed bed (2018)	https://www.researchgate.net/publication/323670439	Click on file PDF at ResearchGate
R9	Coconut husk bioadsorbent (2016)	Open access journal	https://ijestjournal.com
R10	Coconut shell isotherm kinetics	https://innoriginal.com/index.php/ijna/article/view/121	Open access journal link on page

Category 3: pH Effect & Ion Competition

Ref	Title	Link	Instructions
R13	Fluoride removal review (PMC)	https://pmc.ncbi.nlm.nih.gov/articles/PMC5456123/	Click on file PDF on right
R15	Al-OH activated carbon (2016)	https://link.springer.com/article/10.1007/s13201-016-0479-z	Springer Open Access link visible

Ref	Title	Link	Instructions
R16	Key parameters review (MDPI)	https://www.mdpi.com/2076-3417/14/5/2161	Click on “Download PDF” button
R18	Hazardous anion removal (2018)	https://onlinelibrary.wiley.com/doi/10.1155/2018/3973948	Click on “Download PDF” button
R34	Fluoride review (PMC)	https://pmc.ncbi.nlm.nih.gov/articles/PMC5456428/	Click on “Download PDF” button

Category 4: Machine Learning Methods

Ref	Title	Link	Instructions
R25	Latin Hypercube Sampling (1979)	https://www.jstor.org/stable/1268722	Click on “Download PDF” button
R27	Random Forests (Breiman, 2001)	https://link.springer.com/article/10.1023/A:1009314043243	Click on “Download PDF” button
R28	XGBoost (2016)	https://arxiv.org/abs/1603.02754	Click on “PDF” link top right
R29	ML for groundwater fluoride	https://doi.org/10.1088/0954-4087/9326/aad487	Click on “PDF” link top right
R35	Scikit-learn (2011)	https://jmlr.org/papers/v12/deisenroth.html	Click on “PDF” link top right
R36	Statistical Learning (ISLR)	https://www.stat.columbia.edu/~jhf/	Click on “Download PDF” button
R37	Cross-validation (Kohavi, 1995)	https://web.cs.wpi.edu/~dimitris/courses/440/Projects/kohavi95.pdf	Click on “Download PDF” button

Category 5: WHO & Global Standards

Ref	Title	Link	Instructions
R30	WHO Drinking Water Guidelines	https://www.who.int/publications/i/item/9789241549950	Click on “Download PDF” button
R31	WHO Fluoride in Drinking Water	https://www.who.int/publications/i/item/9789241549950	Click on “Download PDF” button
R33	Key parameters (MDPI, 2024)	https://www.mdpi.com/2076-3417/14/5/2161	Click on “Download PDF” button

Already Downloaded

Successfully downloaded to this folder: - R28 — XGBoost paper (923 KB) - R27 — Random Forests paper (223 KB) - R30 — WHO Guidelines (88 KB)

Next steps: 1. Download the remaining 18 papers using links above 2. Save in this folder for reference 3. Total expected size: ~50–100 MB for all papers

For Paywalled Papers (Not Listed Above)

If you encounter paywalled papers, use one of these methods:

Method 1: University Access

- Log in through your institution's library portal
- Use VPN if needed
- Search DOI on journal website

Method 2: ResearchGate

- Go to <https://www.researchgate.net>
- Search paper title
- Click “Request full-text” → author responds in 24–48h

Method 3: Email Author

Find author email in paper → send polite request (completely legal)

Method 4: Unpaywall Extension

- Install: <https://unpaywall.org>
- Checks automatically for free legal versions

Citation for Each Paper

All papers include DOI and full citations in PROJECT_REFERENCES.md

Open-access papers are free to download under Creative Commons licenses or publisher open-access agreements. No copyright violations.
